List of features

- **Taxonomic bars-**
  - *Top 20 families (Barplot)*
- **Habitat composition-**
  - *proportion of species per major habitat type (bar or pie)*
- **Vulnerability distributions-**
  - *how vulnerability scores are distributed and where outliers occur (histogram + boxplot)*
- **Vulnerability by taxonomic group-**
  - *whether some orders/families tend to have higher vulnerability (boxplot)*
- **Geographic scatter / range summaries-**
  - *spatial distribution and whether range-size relates to vulnerability*
- **Range-size vs vulnerability-**
  - *May answer to this: Do species with smaller ranges have higher vulnerability?*
- **Numeric correlation heatmap-**
  - *Strong numeric relationships.*
- **Missingness map-**
  - *Show where missing values concentrate, useful for deciding which variables are reliable*
